Redhawk Wealth Advisors, Inc. Implements Leading Cyber Security Solution to Protect Clients

Minneapolis, MN (04/08/2025) – Redhawk Wealth Advisors, Inc. (“Redhawk”), a national full-service registered investment advisor, announced today that it has implemented a comprehensive end-to-end cyber security suite of services that monitors, protects against, and reports on cyber threats. In today's digital landscape, cybersecurity is of paramount importance for financial advisors and their clients. These new services will greatly enhance the goal of protecting sensitive client data and maintaining the integrity of business operations.

For financial advisors, integrating cybersecurity policies is not just about meeting regulatory demands, it is about safeguarding business continuity and cultivating client confidence. A robust cybersecurity framework not only ensures compliance but also serves as a competitive differentiator. Today’s clients seek financial advisors who prioritize data security, and strong cybersecurity practices that can give firms an edge in attracting and retaining clients.

“Sophisticated cyber actors exploit vulnerabilities to steal information and investments and work to develop capabilities to disrupt, destroy, or threaten the delivery of essential services to clients. The SEC has made it clear that cybersecurity, client data protection, and operational resilience are top concerns. I am extremely pleased that we have implemented a comprehensive cyber policy, supporting technology, and training for our advisors that goes well beyond the requirements of the SEC. This truly signifies how committed we are to protecting personal data and investments.” said Dan Hunt, CEO of Redhawk.

“In today's digital era, consumer data fuels businesses, making it an irresistible goldmine for cybercriminals. According to Accenture’s Cost of Cybercrime Study, while 43% of cyber-attacks target small businesses, only 14% are equipped to defend themselves. We are extremely pleased to be working with Redhawk to make them an industry leader in cyber security.” stated Mark Torello, Partner-in-Charge of Whittlesey Technology.
